

Unique and revolutionary, the SOLO version of the *SmartBottle*® is an oral and drinkable PCA (Patient-Controlled Analgesia), and can be used both at home and in hospitals by many services, particularly for the treatment of post-operative, chronic or palliative pain. The **patient's pain treatment is individualized and fully secured**. With the biometric authentication, the patient can safely take the medication dose prescribed and programmed by a healthcare professional.

It brings **safety, comfort** and **autonomy** to the patients but also to healthcare professionals.

SAFETY:

- Biometric authentication of the patient
- Neutralization system in case of tampering
- Adherence to treatment
- No risk of misuse and diversion.

COMFORT:

- Patient autonomy and mobility
- Nurse time savings
- Maintenance free and up to 2 years of autonomy
- Can be left securely on the patient's bedside table
- Easy to carry thanks to its compact design
- Non-invasive
- No false alarms.

TREATMENT OF THE PATIENT:

- Personalized and individual treatment
- Simple and secured programming
- Regular doses and breakthrough (bolus) doses programming
- Dispensing range per dose: between 5ml to 15ml
- Accurate dosage guaranteed for a drug-solution bag volume of 1000-50mL
- Short-term and long-term care
- Traceability and accurate tracking.
