

The TEAM version of the SmartBottle® is used for the treatment of post-operative, chronic or palliative pain and acts as a **secure metering dispenser** for liquid drinkable medicament.

Intended for use by healthcare professionals, this device can be placed on a trolley during patient rounds. With a simple pressure on the central button, it is possible to **adjust the volume of drug to be delivered for each patient** (5 to 15 mL).

#### SAFETY:

- Biometric authentication of the medical staff
- Neutralization system in case of tampering
- Adherence to treatment
- No risk of misuse and diversion.

#### COMFORT:

- Nurse time savings
- Easy modification of doses prescribed for one patient or another
- Maintenance free and up to 2 years of autonomy
- Can be placed on a trolley for ease
- Easy to carry thanks to its compact design
- Non-invasive
- No false alarms.

#### TREATMENT:

- Distributor and secured dosing
- Up to 20 different authorized caregivers can deliver doses
- Simple and secured programming
- Accurate dosage guaranteed for a drug-solution bag volume of 1000-50mL
- Dispensing range per dose: between 5ml to 15ml
- Short-term and long-term care
- Traceability and dose-distribution tracking.
